Extreme Weather events impact service in Toowoomba

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of extreme weather events in the Toowoomba region of Queensland on or about Saturday 21 September 2008 through to Sunday 22 September 2008.

Due to the effect of damage to the Telstra telecommunications network by a severe thunderstorm which brought with it damaging wind, hail, and numerous lightning to ground strikes, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities. Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Damaging wind, flash flooding and large hailstones referred to in the BOM Severe Weather Warning issued for 20 September 2008 initially at 2:34 PM Saturday 20 September 2008; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances applies to approximately 450 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions. Based on current information, the resumption date of normal service operations is expected to be 1 October 2008. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
